INTRODUCTION

This machine has been carefully designed and constructed to provide you with many years of dependable service. It has been built to meet or exceed current UL or CSA standards. With proper care in operation and maintenance, this machine will assist you in maximizing your efficiency.

To ensure the utmost value and performance from your machine, please read this manual carefully to be sure correct operation procedures are followed.

This manual provides you with operation, troubleshooting, and maintenance procedures for your machine. However, if help is needed or if any of these procedures are unclear, please contact Vidir at 1-800-210-0141.

SERIAL NUMBER

Please be sure to record the serial number for any future service calls and parts ordering.

Serial No. _____

IMPORTANT CAUTION NOTICE:

Vidir has made every effort to protect operators and others from injury due to mechanical parts movement and electrical safety. As with any mechanical device, the operator is responsible to inspect the condition of the machine prior to use and adhere to safe operating procedures at all times.

A factory approved Preventative Maintenance is recommended every 12 months or 100 hours, whichever comes first.

Information in this document is proprietary, confidential, and property of Vidir Machine Inc. Disclosure or duplication of this material is prohibited except by authorization of Vidir Machine Inc.

SAFETY

Important Safety Instructions

Read this manual carefully to ensure familiarity with the controls and the proper use of the equipment. The warnings and precautions contained in this manual **DO NOT** cover all potential dangers, and hazards that may be encountered.

This manual is intended to provide basic safety guidelines for proper operation, maintenance, and servicing of the machine.

WARNING – Risk of injury

- Installation and service of this machine should be performed by qualified service personnel.
- Only properly trained service personnel should have access to the interior components of the machine.
- Electrical connections should be performed by qualified electricians.
- Operation must be performed by trained personnel. Never allow children or unauthorized persons to operate the machine.

DANGER – To reduce the risk of electrical shock:

- Keep cord away from heated surfaces or areas where it can be easily damaged.
- Do not change current limit ratings of overload protectors. For further instruction please contact our service line.
- Turn all switches to the off position and disconnect power to the machine before cleaning, maintenance, or repairs.
- Risk of electrical shock – Connect this machine to a properly grounded outlet only. See grounding instructions.
- Keep the area of operation clear of all persons and potential hazards.
- Always shut off the main power switch before servicing the machine.
- Keep all guards and shields in place

Use this machine only for its intended purpose as described by these instructions.

Do not use attachments not recommended or approved by the manufacturer.

Never operate this machine if it has been damaged, has a damaged electrical cord, or if it is not working properly. Keep all guards and shields in place.

Keep area clean and organized during operation.

For further instruction please contact our service line.

SAFETY

Safety Hazards

	Safety Hazard - Read Manual	-read and understand operator's manual and all other safety instruction before using this machine.
	Safety Hazard - Entanglement	- loose clothing or jewelry could become entangled or drawn in.
	Safety Hazard - Crushing/Rolling	- platform may present a hazard of crushing; hospital bed may present hazard of rolling over toes or hands when loading/unloading the machine.
	Safety Hazard - Electrical shock/ Electrocution	- electrical circuits contain high voltages and may cause shock or electrocution;

Cease all operation and lock out machine in any case where the machine is not operating as designed and call Vidir Service.

SAFETY

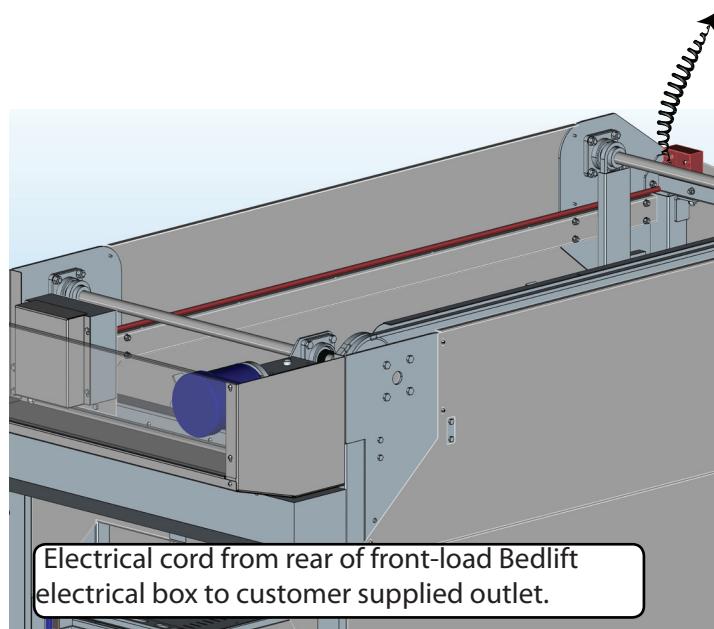

Bedlift Electrical Installation

Locate a customer-supplied outlet near the Bedlift system. Power supplied to this outlet should be on a dedicated/isolated* circuit (**with an equal or less than 16A circuit breaker**), including a dedicated/isolated ground wire to the distribution source.

This circuit should match the electrical specifications of the Bedlift.

Plug-in installation considerations: Power supply cord must NOT run through walls, ceilings, floors and similar openings in the building structure. Be sure to take measures to prevent physical damage to the power supply cord. This includes proper routing of the power supply cord and provision for receptacle (socket outlet) within reach of electrical cord length.

6ft (1.8m) electrical cord is supplied with Bedlift machine. Bedlift can be hardwired by a certified electrician.

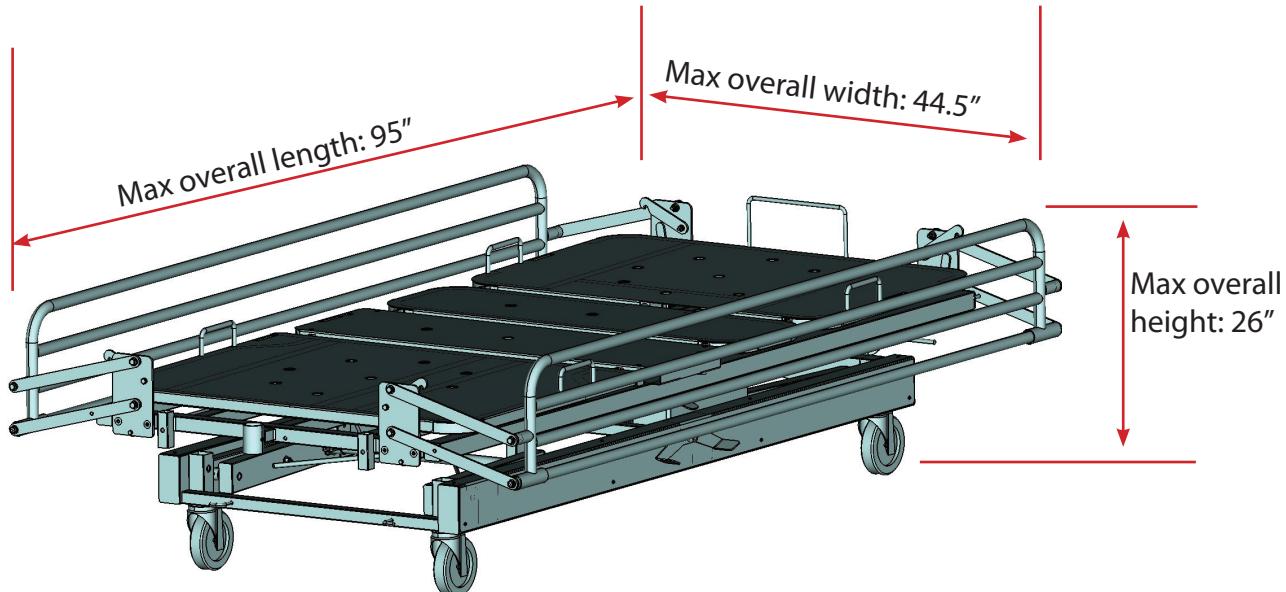

Model	120V, 60 Hz	240V, 50Hz/60 Hz	
	15 Amp	10 Amp	15 Amp
ST327-45R	X	X	
ST427-45R			X
ST527-45R			X
Plug	NEMA 5-15 Type B	Schuko (50Hz)/NEMA 6-15 (60 Hz)	

*Note: "Dedicated/isolated" is defined as separate hot, neutral and ground wires from the customer distribution source/breaker panel to the Bedlift junction box/receptacle. To avoid electrical interference, systems must never share wires with any external equipment.

MACHINE SPECIFICATIONS

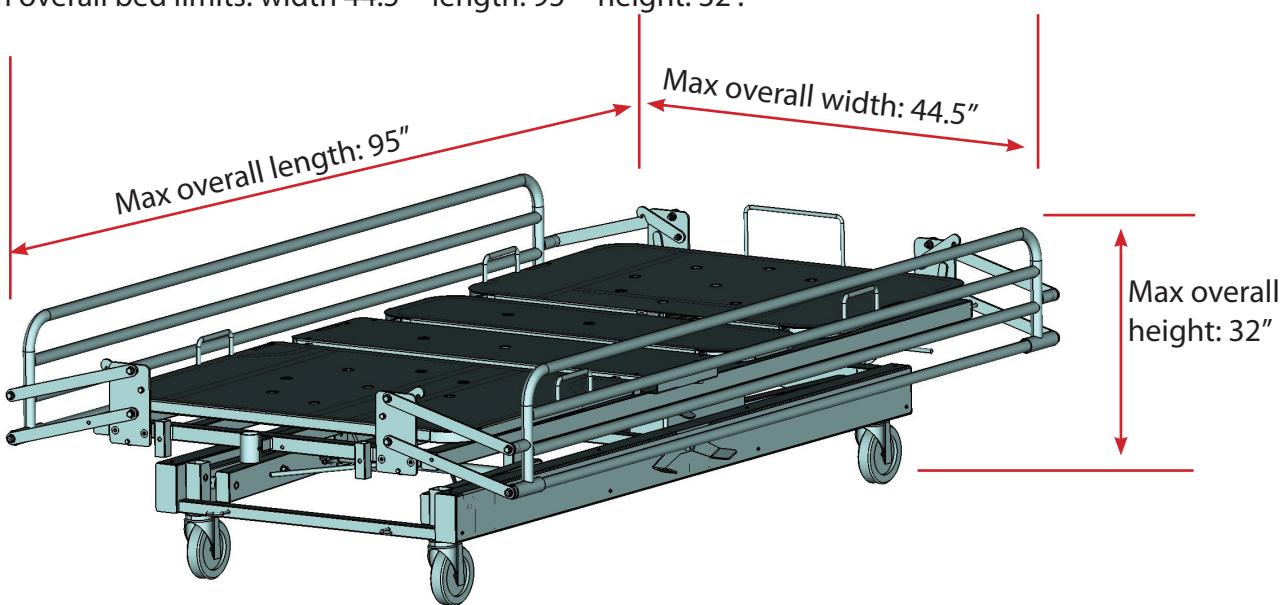

Standard capacity Bedlift maximum load limit: 600lbs/platform.

Maximum overall bed limits: width 44.5" - length: 95" - height: 26".

Extra capacity Bedlift maximum load limit: 900lbs/platform.

Maximum overall bed limits: width 44.5" - length: 95" - height: 32".

Additional specifications:

Noise emissions: less than 70dB. Maximum altitude: 1000m. Temperature range: -10C to +40C.

Humidity: 5 - 95 % without dripping water conforming to IEC 60068-2-3
5 - 95 % without condensation conforming to IEC 60068-2-3

OPERATING INSTRUCTIONS

Operating the Bedlift

(A) Master Switch (410-0044)

(C) Up/Down Button Assemblies (410-0053)

Turn master switch (A) to 'on' position.

Press up or down buttons (C) to lower/raise a loaded bed shelf. Follow unload/load bed procedures as shown on next page.

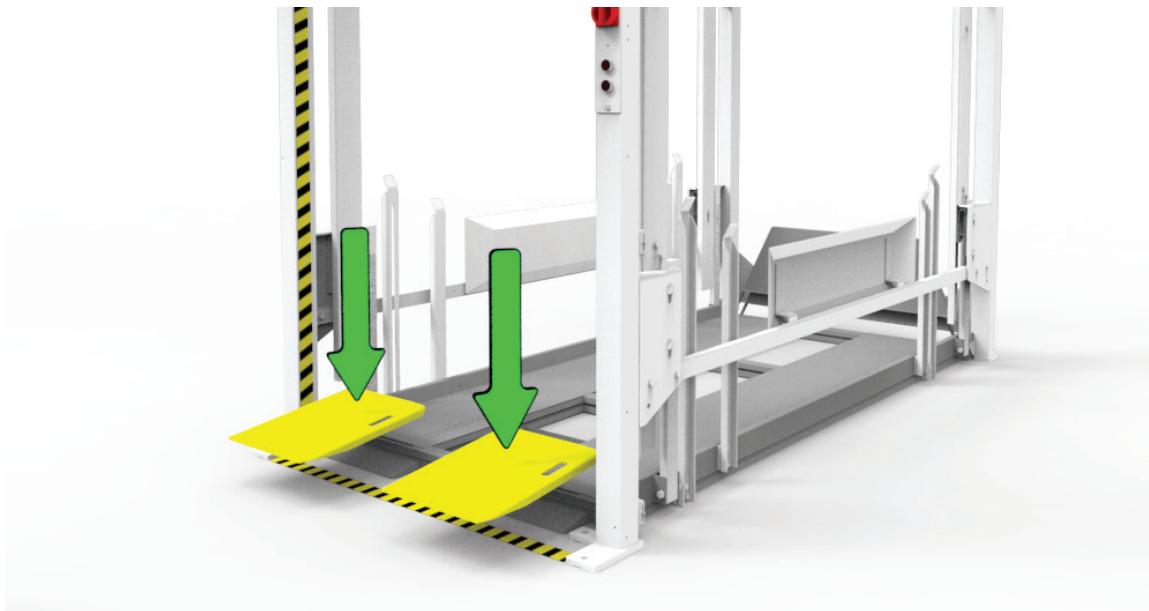

Turn master switch (A) to 'off' position. This switch can be padlocked as necessary.

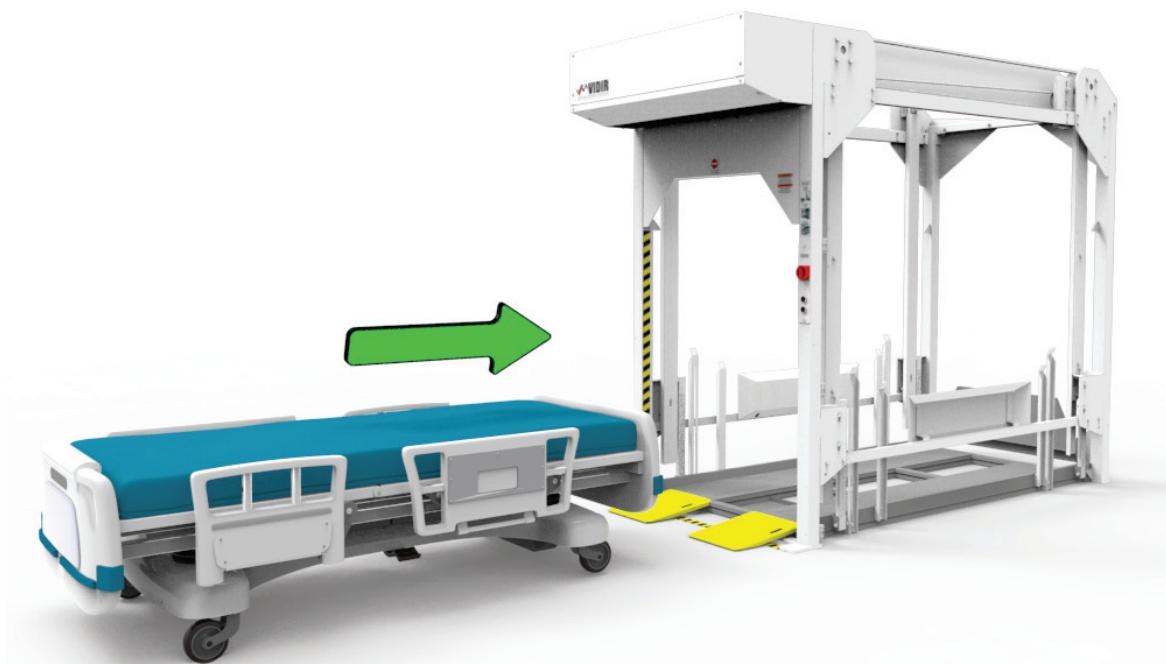

OPERATING INSTRUCTIONS

Loading the Bedlift

1. Install Bedlift loading ramps, and align bed wheels to loading ramps. The bottom platform has integrated ramps, and does not require the separate loading ramps.

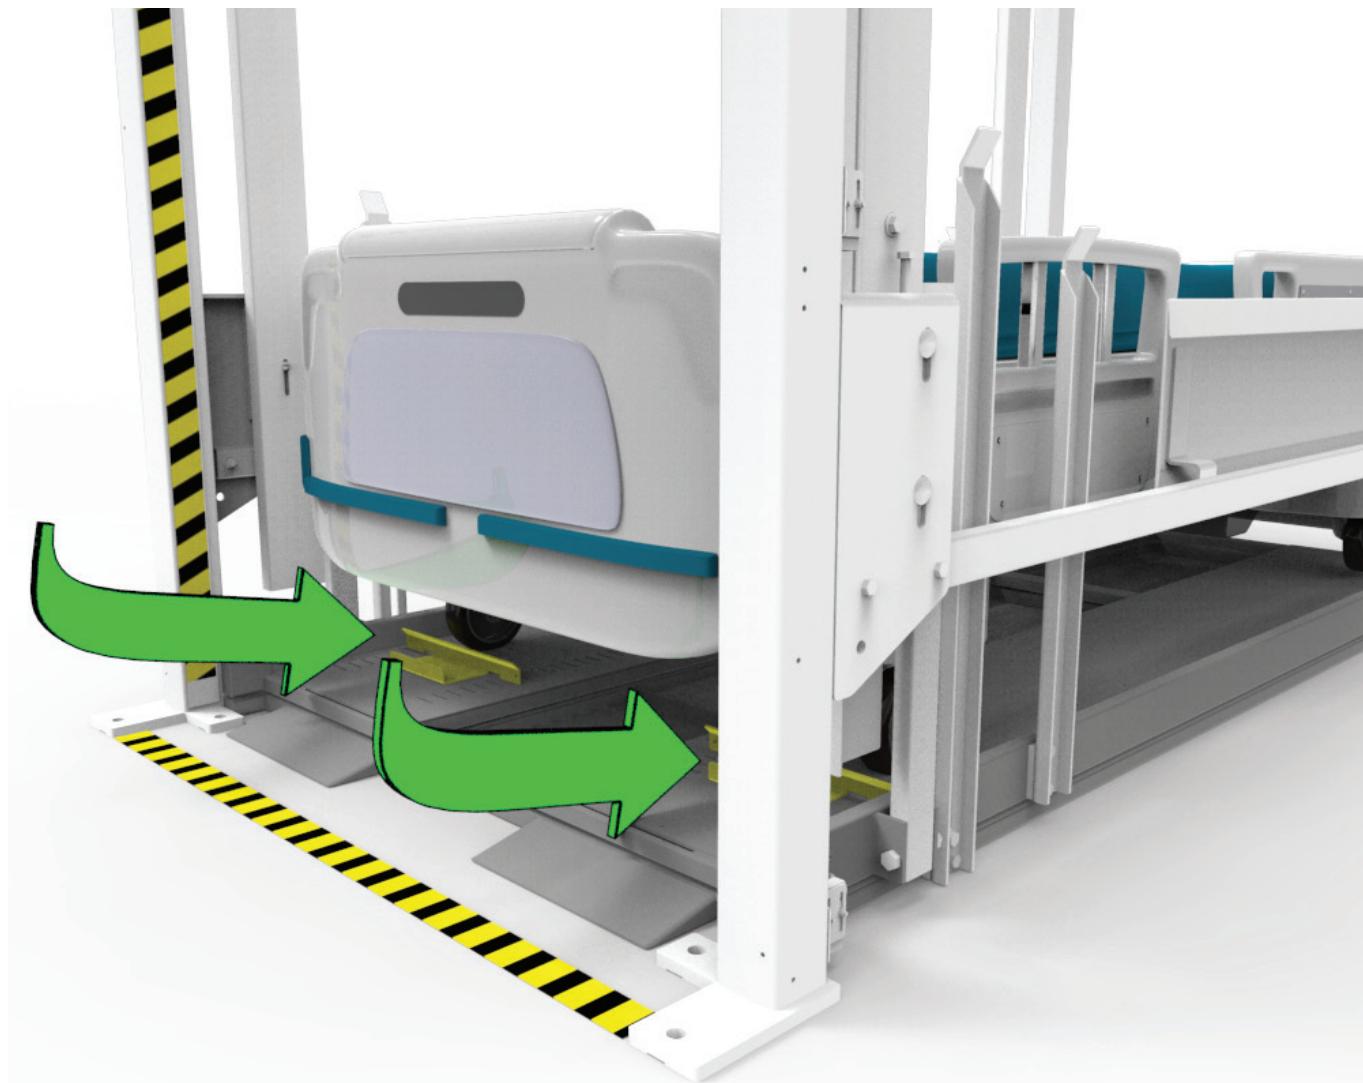

2. Push bed onto platform and remove loading ramps.

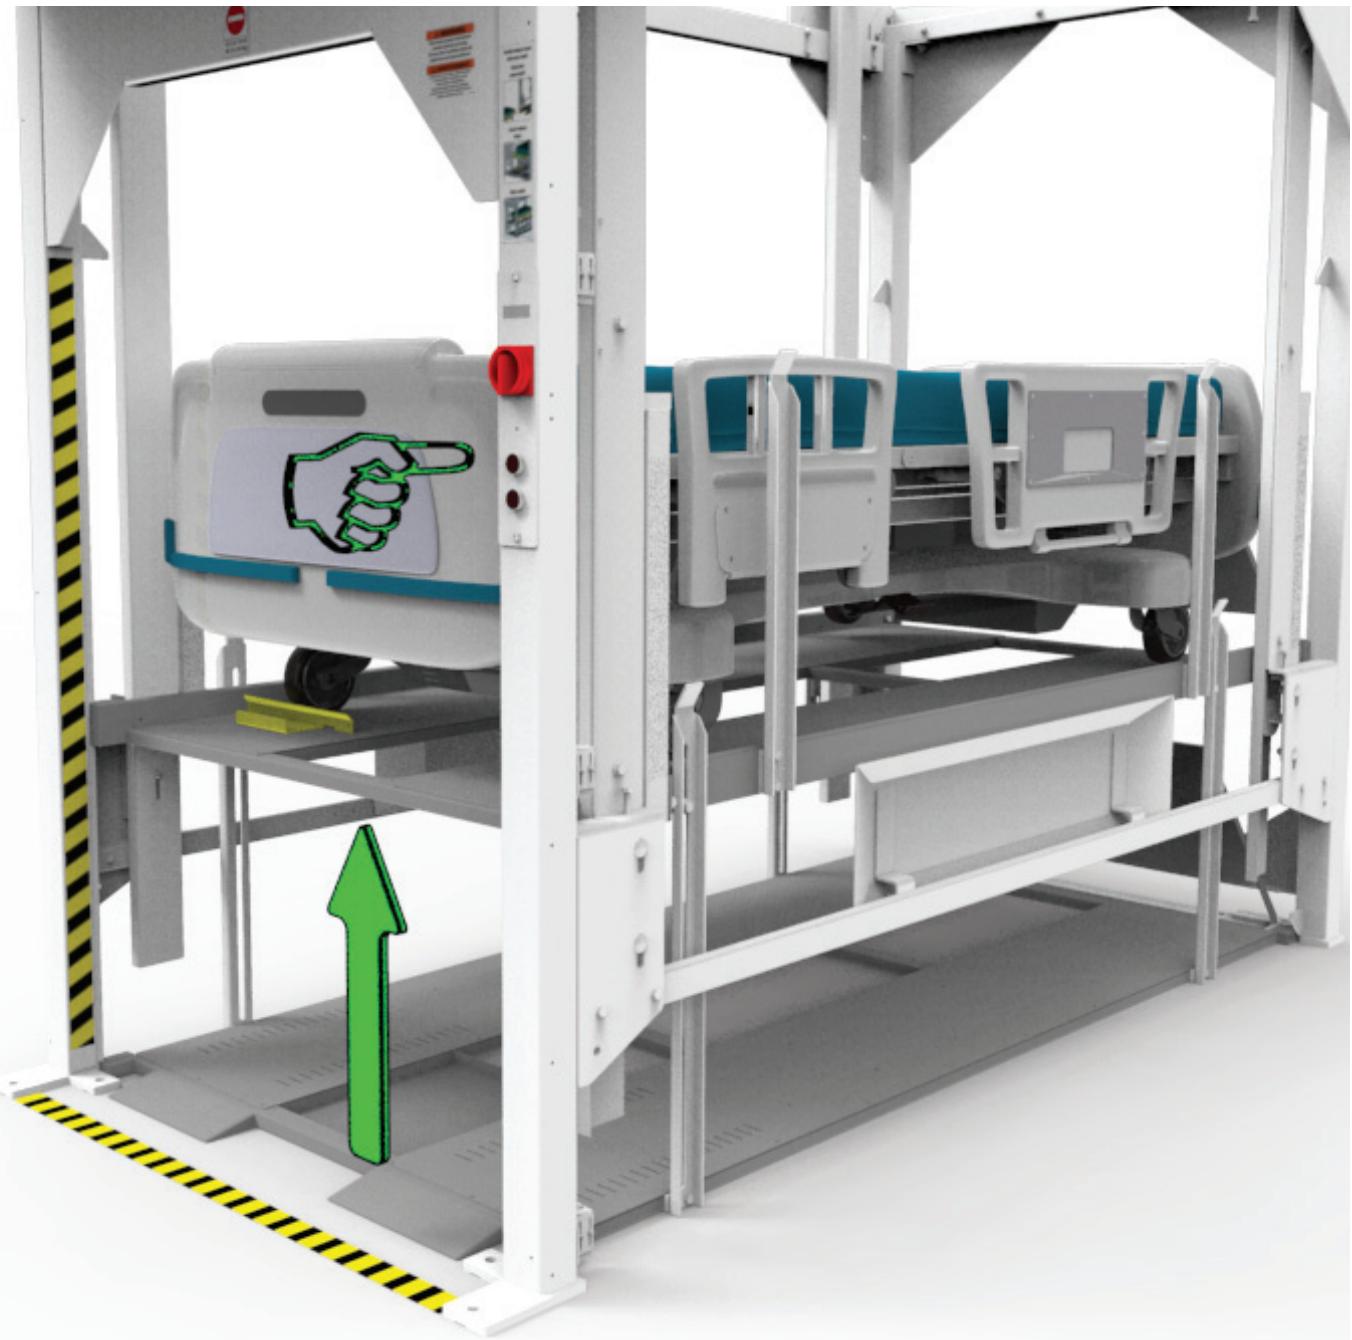

OPERATING INSTRUCTIONS

3. Remove loading ramps. Insert wheel stops.

OPERATING INSTRUCTIONS

4. Press 'UP' button to raise platform.

5. Load the next bed, insert wheel stop and repeat until all platforms and ground level hold a bed.
6. The bottom bed is stored on the ground level.
7. It is only the top platform that engages the limit switches on the front right main tube

OPERATING INSTRUCTIONS

Unloading the Bedlift

1. **When lowering a platform to ground level, ensure the ground level bed has been removed and there are no other obstructions.**
2. Press and hold the "DOWN" button, and all platforms will lower and stop once the bottom platform has reached ground level.
3. Remove the bottom platform wheel stops, and unload the hospital bed from the bottom platform.
4. Press and hold the "DOWN" button.
5. The next platform will lower and stop when the bottom platform has been reached.
6. Remove the platform wheel stops, **install ramps** and unload the hospital bed.
7. Continue until all platforms have been unloaded.

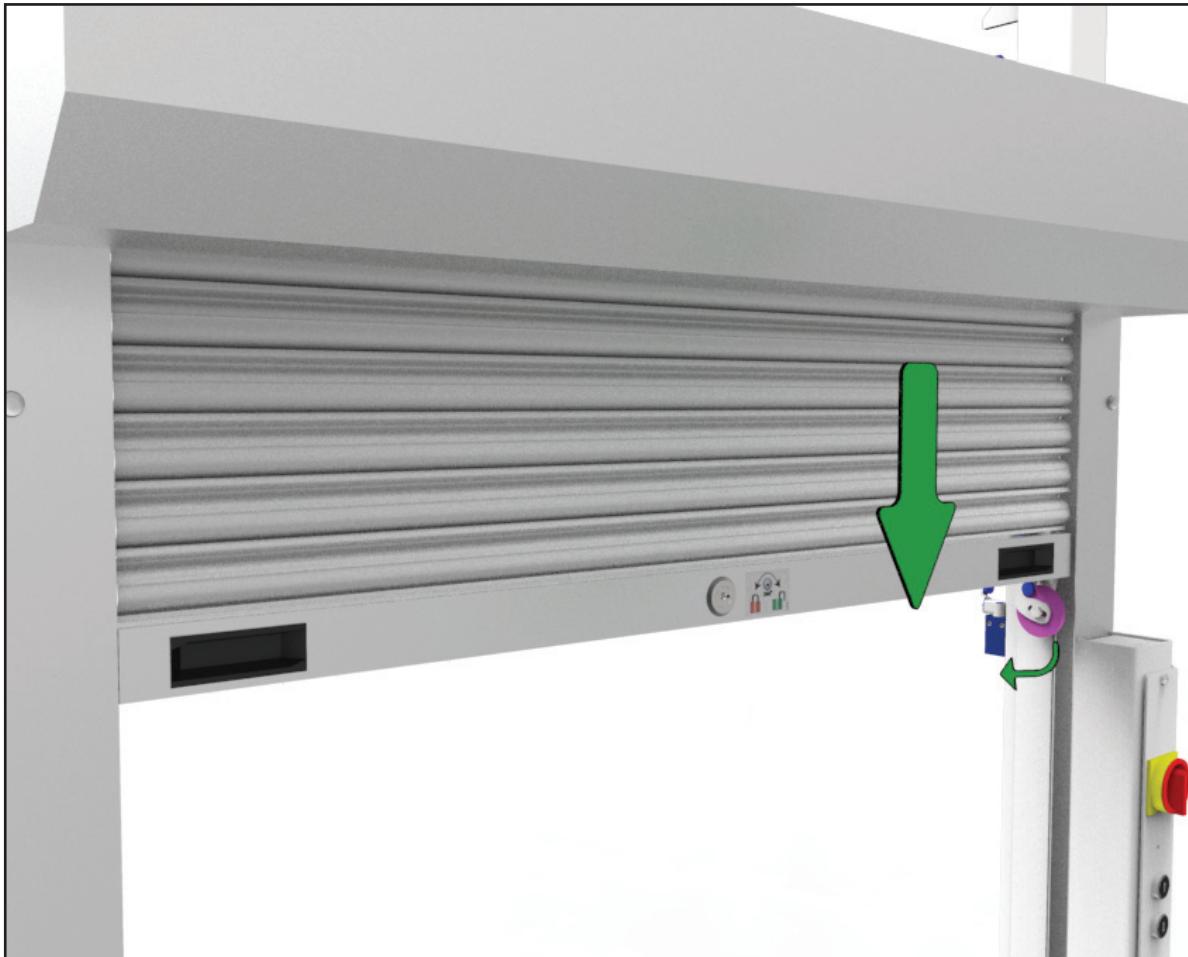

MACHINE OPTIONS

Vertical Security Gate

Locking the security gate: Pull the gate downward from the open position until the gate passes over the sensor wheel (shown in purple).

Once the gate has passed over the sensor wheel, the Bedlift will not operate.

Pull the gate to the floor.

Lock the gate with supplied key turning counterclockwise as indicated on the decal.

Opening the security gate: Unlock the gate with the supplied key, turning clockwise as indicated on the decal.

Push the gate upward from the floor.

Once the gate passes the sensor wheel, the Bedlift will operate normally.

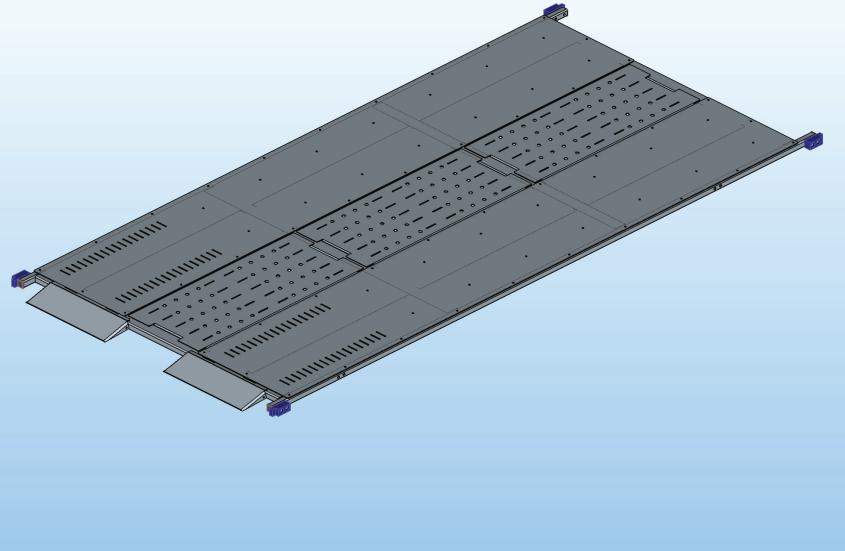

The gate will stop when it reaches its top limit.

MACHINE OPTIONS

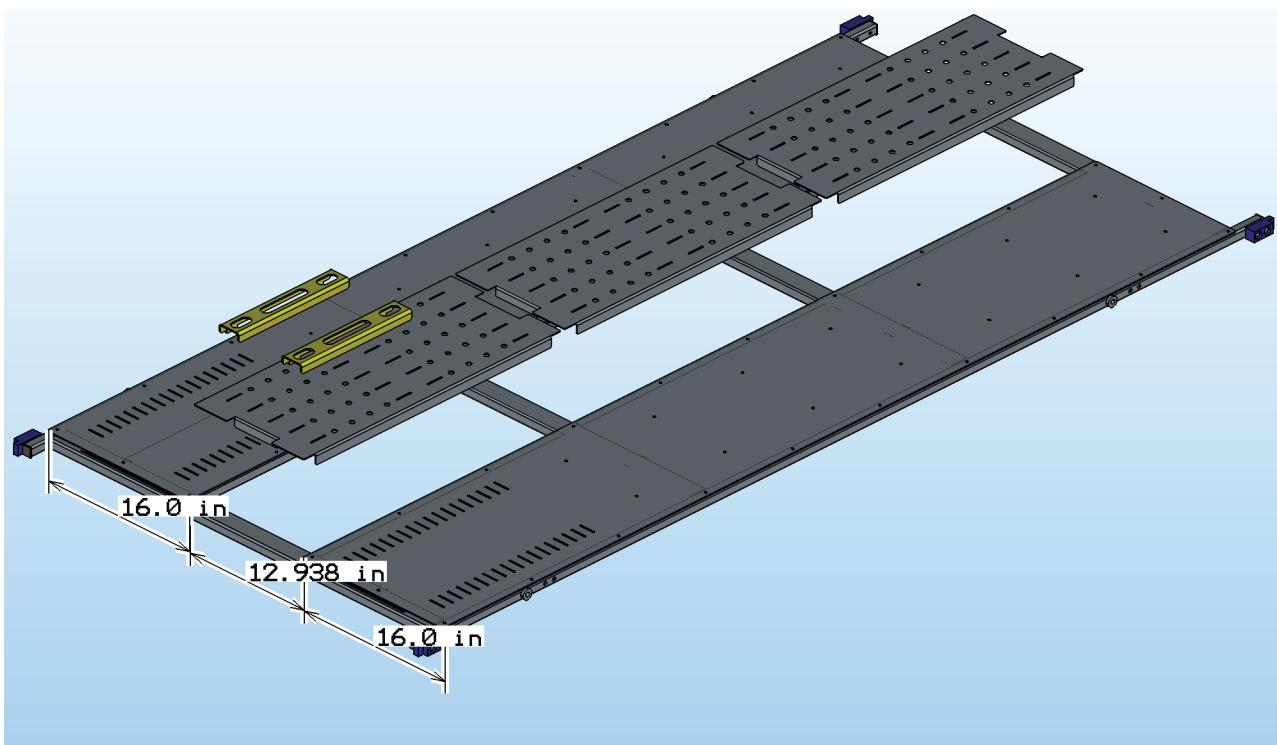

Platform Bridge Plate

Bridge plates eliminate the gap between platform surfaces to accommodate hospital beds with a narrower track (the spacing between the 2 front wheels).

Three bridge plates per platform are required (except for the bottom platform which is supplied with 1 bridge plate as standard equipment to store wheel stops).

After the bridge plates are installed, wheel stops are stored on each platform.

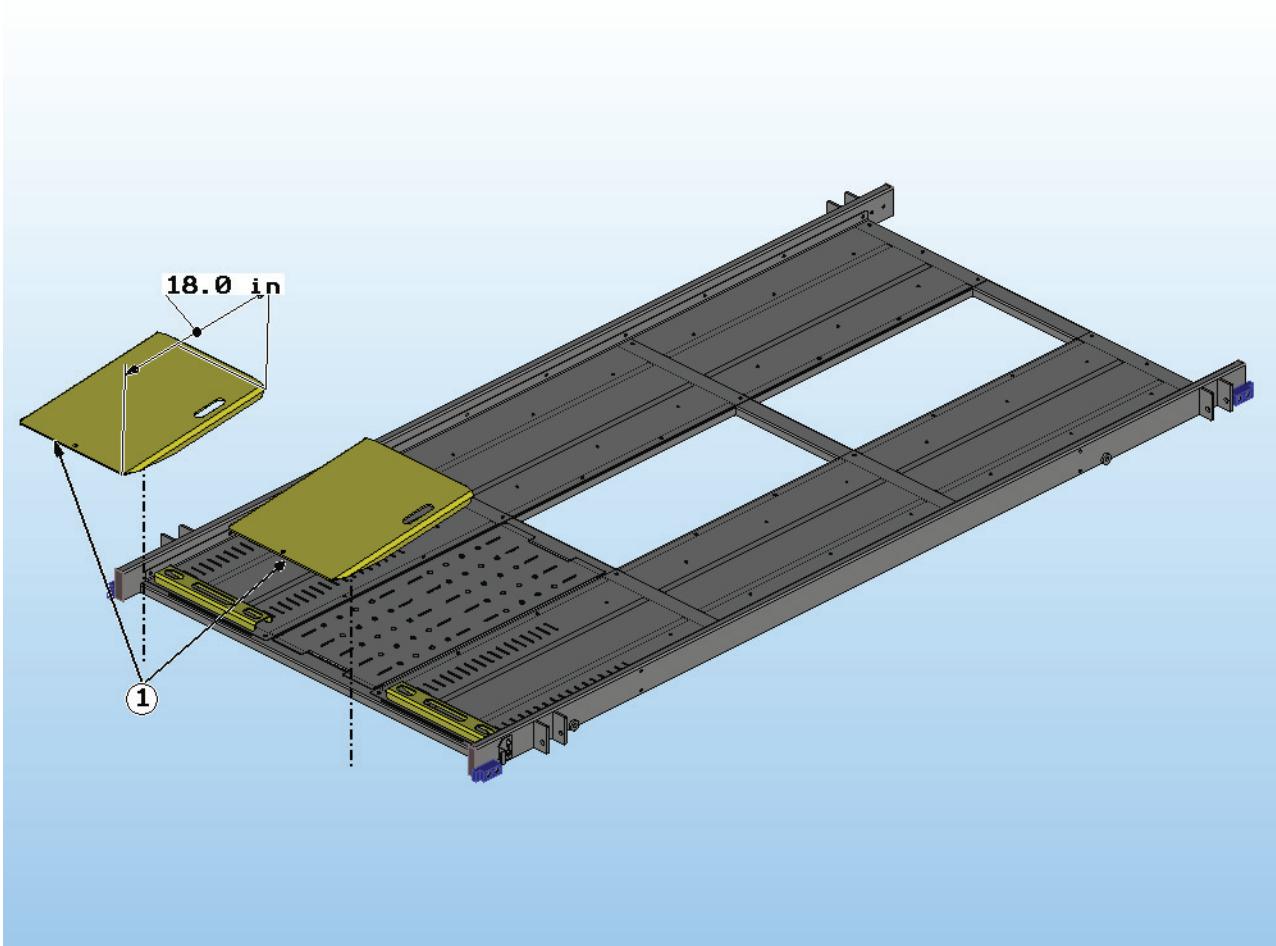

MACHINE OPTIONS

Extended Ramps

Available for front loading Bedlift ST3xx, ST4xx, ST5xx machines.

Not available for front loading Bedlift ST2xx machines.

12.....	Shutter Door Limit Switch Assembly (includes items 1, 2, 4, 5, 6, 7)	5-77333

INSTALLATION

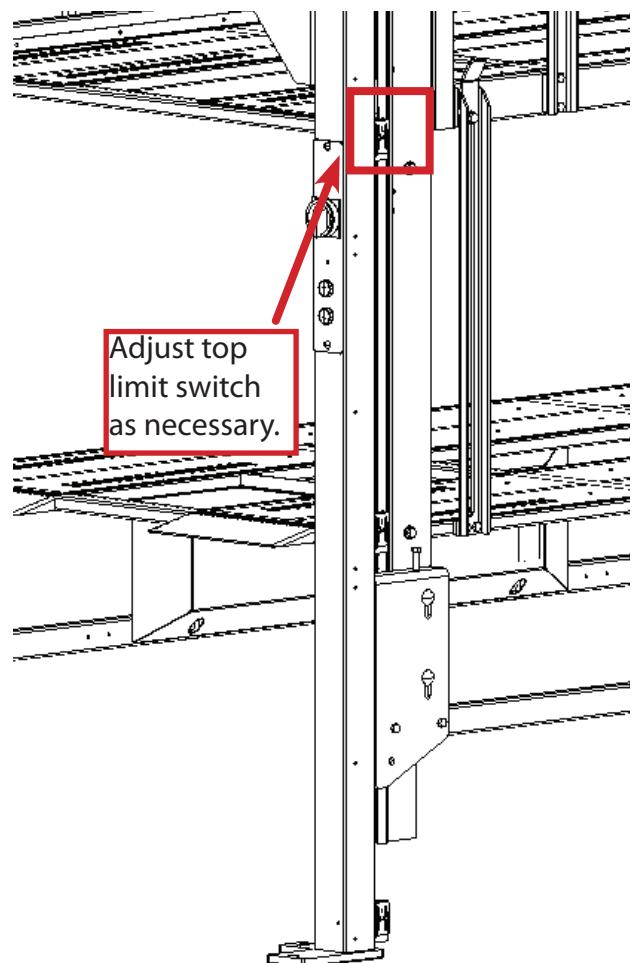

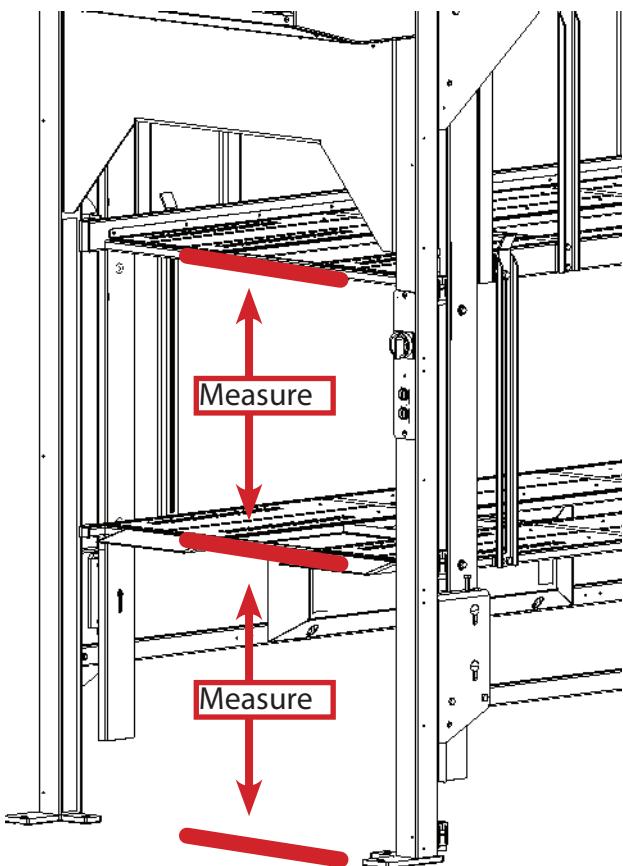

Limit Switches

- Turn the master disconnect switch to the 'on' position.

Press and hold the 'up' button until all platforms have reached the top limit, and stop.

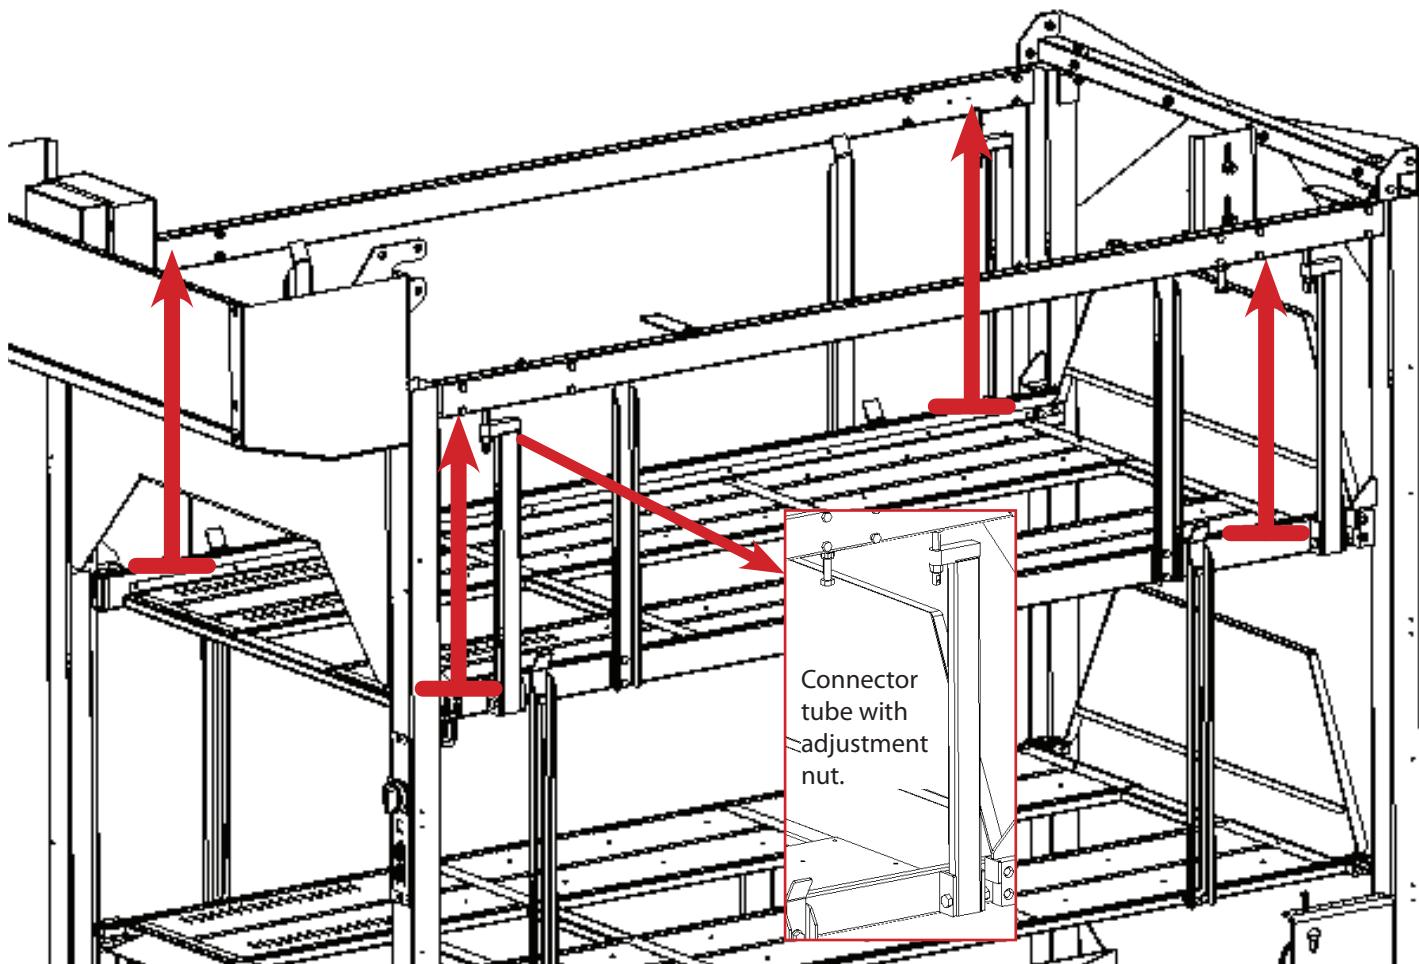

- Measure the distance between the top, and second platform. Measure the distance between the floor to the bottom of the lowest platform. Both measurements should be identical. If not, adjust top limit switch.

INSTALLATION

Limit Switches

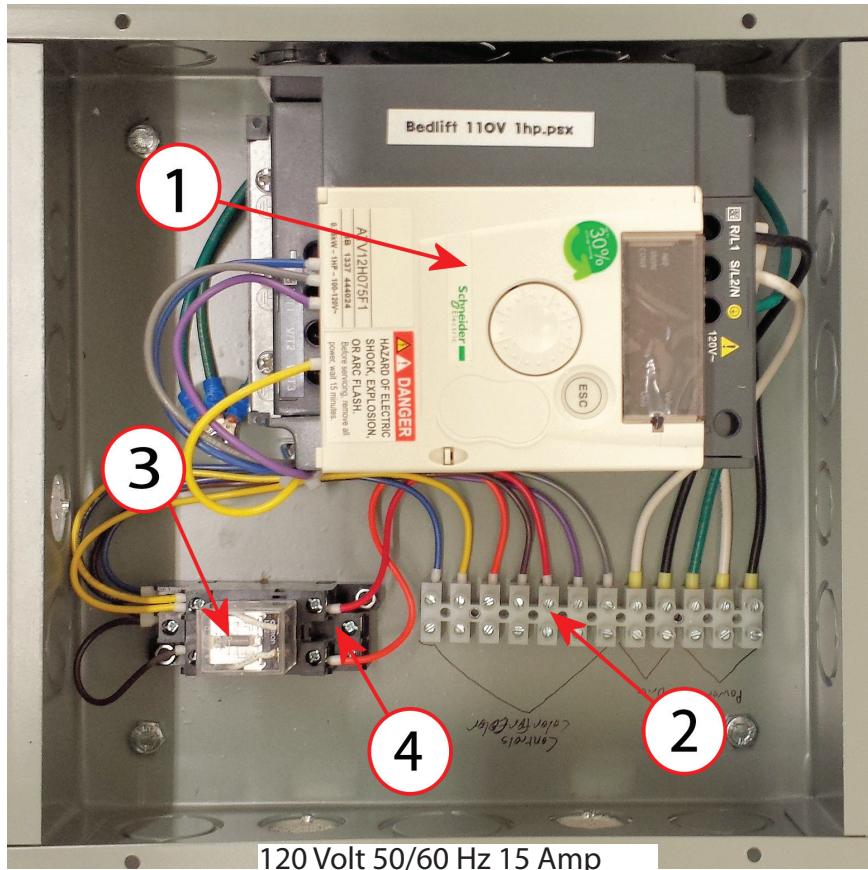

3. Measure from the top platform to the top side brace tube.
Measure all 4 corners of the top platform.
All 4 corners must be identical. Use adjustment nuts on connector tubes as necessary.

4. Press and hold the 'down' button, and lower the top platform approx. 12" (approx. 30cm).
4. Press and hold the 'up' button.
Once the platforms stops, the distance between the top platform and top side brace tube should be identical to step 3.
Adjust the top limit switch as necessary to achieve the same measurement.

MAINTENANCE

Maintenance Schedule

Weekly maintenance:

- Wipe the machine down with an approved cleaner (windex, hydrogen peroxide wipes).
- Ensure work area is clean; don't allow foreign material to enter machine, or go under platforms.
- Ensure all guards are in place and functioning as intended.
- Report any damage or unusual noises to your Maintenance Supervisor.

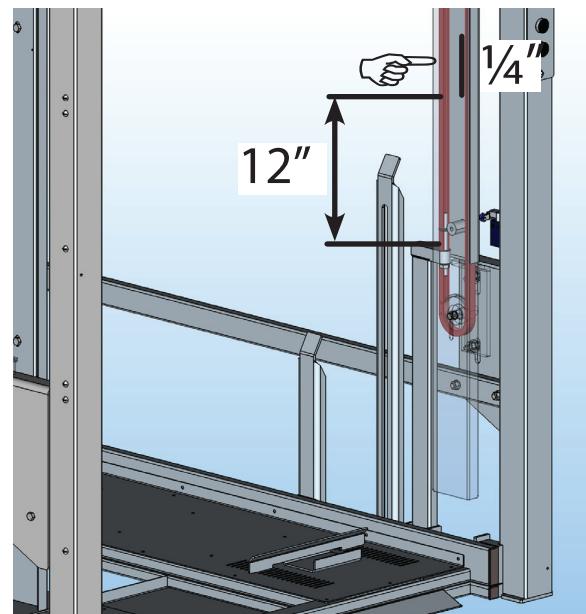

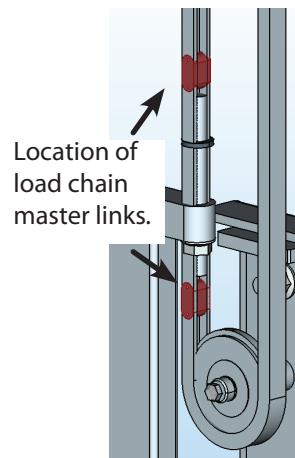

Monthly maintenance:

- Inspect overall machine operation.
- Ensure platforms stop at the correct height.
- Visually inspect for oil leaks; clean up any drips; monitor and note frequency and schedule repair.
- Visually inspect vertical load chains, front-to-back chain, and drive chain.

Yearly/Preventative Maintenance:

- Unload all platforms and inspect entire machine, including the platforms and backstops. Inspect upper and lower master links on all 4 load chains.
- Run all platforms up and note bottom platform stays at ground level for loading.
- Run all platforms to ground level; physically check vertical load chains, and load chain tension.
- Check gearbox oil level, add as needed.
- Check gearbox sprocket chain alignment.
- Check front-to-back chain and sprocket alignment.
- Check the set screws are tight on all sprockets.
- Check tightness of bearing locking collars.
- Inspect vertical slider brackets and bolts on all platforms.
- Inspect platform guides for wear or damage on all platform.

Fill out the Preventative Maintenance checklist and note any abnormalities, making sure to schedule needed repairs.

All platforms at ground level; measure 12" from top of vertical connector tube; push on the load chain; deflection of 1/4" or more requires increasing load chain tension.

VIDIR Bedlift Preventative Maintenance Checklist

Location	City	State/Province	Date of Service:
Serial No.		Model/Type	
Service Company:		Hospital Signoff:(Print)	
Service Technician (Print):		Title:	
Service Tech Signature:		Signature:	

Preventative maintenance is recommended every 100 hours or 12 months. The inspection of all sprockets, bolts, pins, mounting hardware, chains and the overall condition of these components are critical to ensure machine safety, and integrity of the preventative maintenance process. Initialling each line as indicated below confirms these items have been thoroughly inspected for defects.

✓ Indicates item is inspected and in good condition - ✗ Indicates item requires additional service	Service	Initials
General Visual Overview		
Ensure no foreign objects projecting into the machine operation path.		
Ensure all covers and guarding are in place, and secure.		
Visually inspect bolt-on parts, and fasteners.		
Mechanical Inspection, Motor, Gearbox, Limit Switches		
Inspect motor/gearbox mounting bolts, ensure bolts are secure.		
Inspect gearbox for oil leaks and check/add oil as needed.		
Verify drive chain alignment, and proper tension; adjust as needed.		
Check all sprocket set screws are tight, and sprockets have not moved.		
Check limit switches for good condition, and proper cut-off when operating up/down.		
Load Chain, Bearings, Sprockets, and Platforms		
Remove all beds, keep platforms down, and switch off machine.		
Inspect load chain tension, chain connectors, and lifting bolt condition (remove vertical cover if needed), tighten and lube as needed.		
Inspect both driveshaft & sprocket alignment positions, and bearings & lockcollars.		
Inspect all vertical slider brackets and bolts on all platforms.		
Inspect blue plastic guides on platform corners for wear and condition.		
Inspect backstops on each platform for proper alignment.		
Turn power on, and check for smooth platform operation up and down		

Conclusion: This unit has been inspected and serviced for safe operation and is operating as intended by the manufacturer.

Comments and Parts Used (If any):

SHIPPING DIMENSIONS + WEIGHT

All crates are built to the sizes listed below, and are packaged to contain 1 Bedlift unit and hardware.

Model	Crate Dimensions	Shipping weight
ST327-45R	104" x 48"x 24"	1500lbs
3bedlift standard side panel assembly = 172 lbs		
3bedlift standard back panel assembly = 71 lbs		
ST427-45R	133" x 48"x 24"	1800lbs
4bedlift standard side panel assembly = 223 lbs		
4bedlift standard back panel assembly = 95 lbs		
ST527-45R	160" x 48"x 28"	2200lb
5bedlift standard side panel assembly = 275 lbs		
5bedlift standard back panel assembly = 122 lbs		
ST233-45X	104"x 48"x 24"	1400lbs
2bedlift left side panel assembly = 140 lbs		
2bedlift right side panel assembly = 149 lbs		
2bedlift back panel assembly = 72 lbs		
ST333-45X	116" x 48"x 26"	1700lbs
3bedlift HD side panel assembly = 208 lbs		
3bedlift HD back panel assembly = 90 lbs		
ST433-45R	152" x 48"x 26"	2000lbs
4bedlift HD side panel assembly = 275 lbs		
4bedlift HD back panel assembly = 121 lbs		

Panel pallet is 106"L x 33"W x 11" H at the lowest for one panel and approx. 130lbs just for the wood.

Pallet must be handled using a lift truck. 6ft fork extensions are optional. Pallet can only be handled from the open end.

WARRANTY & LIABILITY

Vidir Machine Inc. Warranty Agreement and Limitation of Liability

1. Vidir Machine Inc. (Vidir) warrants solely that the equipment shall be free from any defect due to faulty workmanship or material deficiency at the time of delivery to the buyer thereof (the Buyer) and for a period of one year therefrom.
2. All work except minor repairs or adjustments to the equipment furnished on an emergency basis, will be performed during regular working hours. If the Buyer requests that repair work be performed outside of regular working hours, it is the responsibility of the Buyer to pay the difference between regular and premium labour rates at the then standard hourly billing rate.
3. This warranty shall be voided by any modifications to the equipment or any use of the equipment for any purpose other than that for which it was specifically intended.
4. This warranty is the only warranty made by Vidir. The Buyer hereby expressly waives any obligations or liability, including liability for loss or damages due directly or indirectly, any obligations including, without limitation, loss of use, revenue, or profit, shipping and handling, and injury to person or property.
5. It is the responsibility of Buyer to know, understand and comply with the work and safety laws and regulations in effect and governing Buyer's use of the equipment. To the extent governing law requires inspections, records keeping and/or after-purchase modifications to the equipment, it is the responsibility of the Buyer to arrange for and comply with such requirements and any associated costs are the sole responsibility of the Buyer. Vidir assumes no responsibility or liability for Buyer's performance under or compliance with such laws and regulations.
6. If the equipment is found by the Buyer to be defective, the Buyer must notify Vidir within a period of 30 days of discovery of the defect.
7. The Buyer is expected to provide access to all equipment covered by this warranty. Vidir shall not be responsible for any expense incurred in removing, replacing, or refinishing any part of the building structure necessary for the performance of Vidir's obligations under this warranty.
8. In the event that any alterations, additions, adjustments or repairs are made by others without Vidir's prior written consent, Vidir may, at its option, immediately terminate this warranty by providing written notice to the Buyer.
9. In the event Vidir is required to make emergency calls, repairs and/or replacements under this warranty occasioned by the Buyer or any user's negligence, improper operation or misuse of the equipment or by fire, explosion, flooding, the elements, strikes, labour troubles, vandalism, riots or civil commotion, or by any cause beyond Vidir's control. The Buyer shall reimburse Vidir for such emergency calls, repairs and/or replacements in accordance with the then current rates for such services.
10. Vidir's liability for injury to persons or property shall, in any event, be limited to that caused directly by its negligence. Vidir shall not be liable, however, on any account, for any damage or loss to the Buyer or its dealers, representatives, affiliates or agents resulting from business interruption, inconvenience, loss of profits, or special or, indirect or consequential damage. Vidir shall not be deemed to guarantee or warrant the continuing operation or operating efficiency of the equipment covered, nor shall Vidir be liable for any breakdowns thereof or for any damage to any other property of the Buyer not covered by this warranty but resulting from any breakdowns in or operating mishaps of the equipment covered.
11. Should any payment due by the Buyer become thirty days or more delinquent, Vidir may terminate this warranty by written notice, and all moneys owed Vidir shall be immediately payable on demand.
12. This warranty is not transferable or assignable by the Buyer.
13. Vidir reserves the right to determine, in its sole and absolute discretion the best means and methods to be employed for any corrective or repair work deemed necessary by Vidir pursuant to this warranty.
