### **Number and Lengths of Tracks**

Use the following chart to determine the track lengths and quantity used for the various base configurations.

Base model	Track quantity	<u>Track length</u>	<u>Track length</u>
			(CA. MA. Only)
MMB32	5	50" per base plus 64"	57" per base plus 64" aisle
MMB28	5	aisle	·
MMB24	4		
MMB20	4		

# of bases	Aisle	Inches per base	Total Track	Inches per base	Total track
3	64"	50"	214"	57"	235"
4	64"	50"	264"	57"	292"
5	64"	50"	314"	57"	349"
6	64"	50"	364"	57"	406"
6	64"	50"	364"	57"	406"
7	64"	50"	414"	57"	463"

### **MMB Anti-Tip Installation Detail**

### **MMB Anti-Tip Installation Detail**

### **MAINTENANCE**

### **Troubleshooting**

Comments and explanation of terms used.

Unit = MMB

**1st unit** = this unit plugs to the electrical box on the wall.

**2nd unit** = this unit plugs into unit number 1.

Wall mounted electrical box contains the ice cube relays for photo sensors and VFD for all units.

**Rear electvrical box** contains the motor contactor, terminal strip and telephone jack.

Front electrical control panel contains the green and red lights and the direction switches.

**Sensor Flaps;** 1 at each corner that hold the photo sensors.

**Red light** indicates an obstruction or that the photo sensors are misaligned.

**Green light** indicates power to the unit.

Units have a soft start. Please allow some time for units to start moving after pressing the direction buttons.

#### **Troubleshooting**

Problem	Symptoms	Solution
Unit will not run in either direction	No green light	- Pull E-stop button - Ensure unit is plugged in - Check all wiring connections at the rear electrical box
Unit will not run in either direction	Green light and red light	- Remove any obstructions - Check sensor flaps for damage and alignment - Check if sensors are securely fastened - Gently move sensor flaps to ensure they move freely - Check wiring connections - Ensure unit isn't skewed on the tracks
Unit will not run in either direction	Green light and no red light (no clicking sounds to indicate that unit is attempting to run)	- Check all the wiring connections and plugs at the rear electrical box on the unit and on the box on the wall - Check motor connections - Turn power off for 30 seconds on the wall box - Check front to back cord for damage
Unit attempts to run	Green light no red light (clicks and strains)	<ul> <li>Check the drive display</li> <li>Check if unit is skewed</li> <li>Check drive chain on motor</li> <li>Check for obstructions</li> <li>Check wire connections</li> <li>Repair motor plug connections</li> </ul>

# **MAINTENANCE**

## **Troubleshooting (con't)**

Problem	Symptoms	Solution
All of the units click but will not run	Green light no red light (clicks but no straining)	- Turn power off for 30 seconds on the wall box - Check all the wiring connections and plugs at the rear electrical box and on the box on the wall - Reset power supply breaker
Unit runs only in one direction	Green light no red light	- Check all the wiring connections and plugs at the rear electrical box & wall box
Unit runs only in one direction	Green light and red light	- Clear any obstructions - Check sensor flaps for damage and alignment - Check that sensor eyes are securely fastened inside sensor flaps - Check all the wiring connections and plugs at the rear electrical box and on the box on the wall - Check to ensure that the control panel is mounted square and securely to the frame
Unit runs a short dis- tance and stops	Green light and red light	<ul> <li>Check for an obstruction</li> <li>Check if unit is skewed</li> <li>Check if wheels are jammed against the frame</li> <li>Check to ensure that the control panel is mounted square and securely to the frame</li> <li>Check sensor flaps for damage and alignment</li> </ul>
Unit will not run in one direction	Blinking green and no red light	- Check photo eye power cord for damage
Unit A runs but not with unit B plugged	Green light dims, or is off	<ul> <li>Check to ensure all cords are not damaged</li> <li>Ensure cord ends are not damaged or dirty</li> <li>Check front to back cord for damage</li> </ul>
Unit is skewed on the tracks	Green light but will not move at all or moves short distance in one direction	- Check to ensure no boxes are sticking past the side of the MMB - Check if wheels are rubbing the frame if so move over and install a 1 ½" hose clamp on the shaft - To correct, block one side and run machine until straight
Unit is off track	Will not run at all or moves only a little dis- tance	- Unload unit and lift unit back onto the tracks - Call service

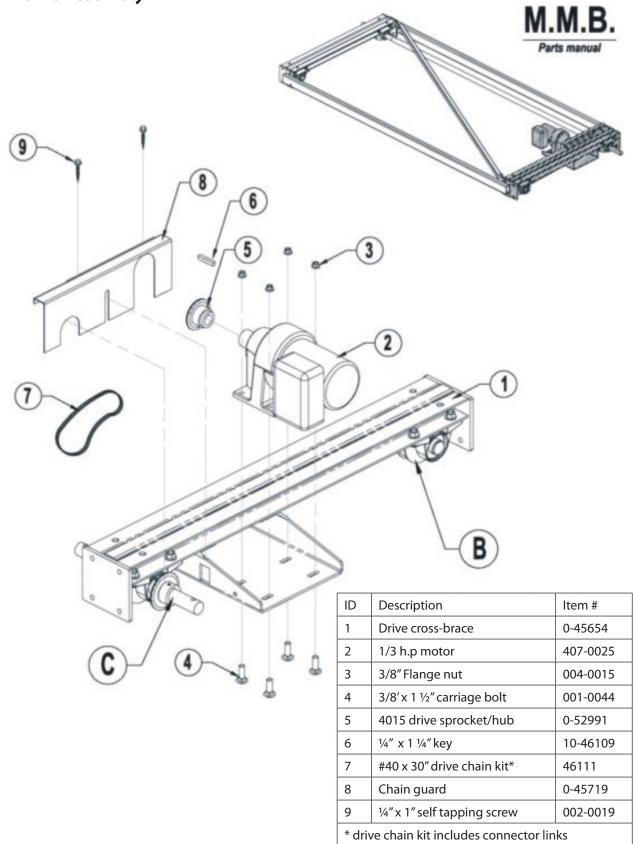

# **MAINTENANCE**

## **Troubleshooting (con't)**

Problem	Symptoms	Solution
Unit continues to move after releasing the button	Unit will not stop	- Check if button is sticking - Check to ensure no boxes are sticking past the side of the MMB
Unit runs with red light lit	Unit doesn't stop on red light	- Check wiring in front panel - Check front to rear cord - Check wire connections - Check rear small curly cords

# **VIDIR** MMB Preventative Maintenance Checklist

Company	City		Province	Date
Store No.	Serial No.	Model/Type		
Service Company:		Store Signoff:(Print)		
Service Technician (Print):		Store Title:		
Service Tech Signature:		Store Signature:		

<u>Preventative Maintenance is Recommended 12 Months. Inspect both sides of the machine.</u> The inspection of all cords, tracks, obstruction stops, and the overall condition of these components are critical to ensure machine safety, and integrity of the preventative maintenance process. Initialling each line as indicated below confirms these items have been thoroughly inspected for defects.

✓ Indicates item is inspected and in good condition - 🗴 Indicates item requires additional service	Service	Initials
Check all bolts, ensure they are tight.		
Check front panel that its vertically plumb.		
Check condition of cords, front to back should be routed inside frame to back, zip tied at sensor flap.		
Curly cords condition, mounted securely to back wall.		
Check for stock between units and back wall, instruct manager on duty if present.		
Check for stock protruding beyond the racking frame. Instruct manager on duty.		
Check condition of track, ie; broken or bent up, missing sections.		
Main electrical box is accessible, not damaged. Mounted to wall.		
Check each base operation:		
Obstruction stops unit left and right.		
Obstruction turns red light on.		
Green light comes on when red power button is on		

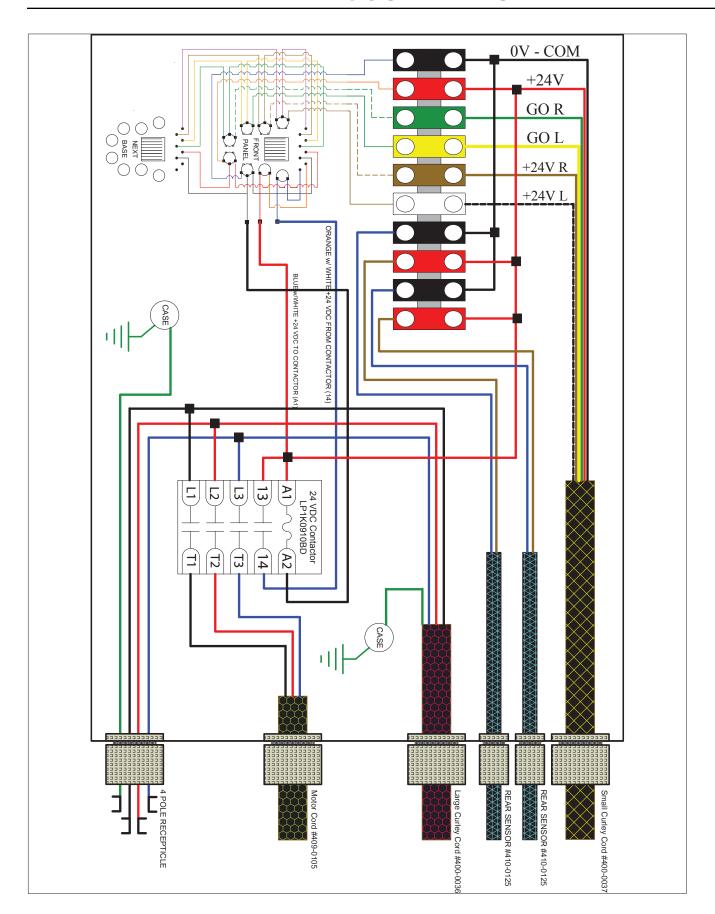

#### **Required Components**

QtyDescription	Part #
1MMB front to rear cable	400-0038
1Curly cord (small)	400-0037
4Curly cord (large)	400-0036
2P-clip	111-1096
2 MMB sensor flap (universal)	10-57173
10 Plastic zip ties, 6"	121-0001

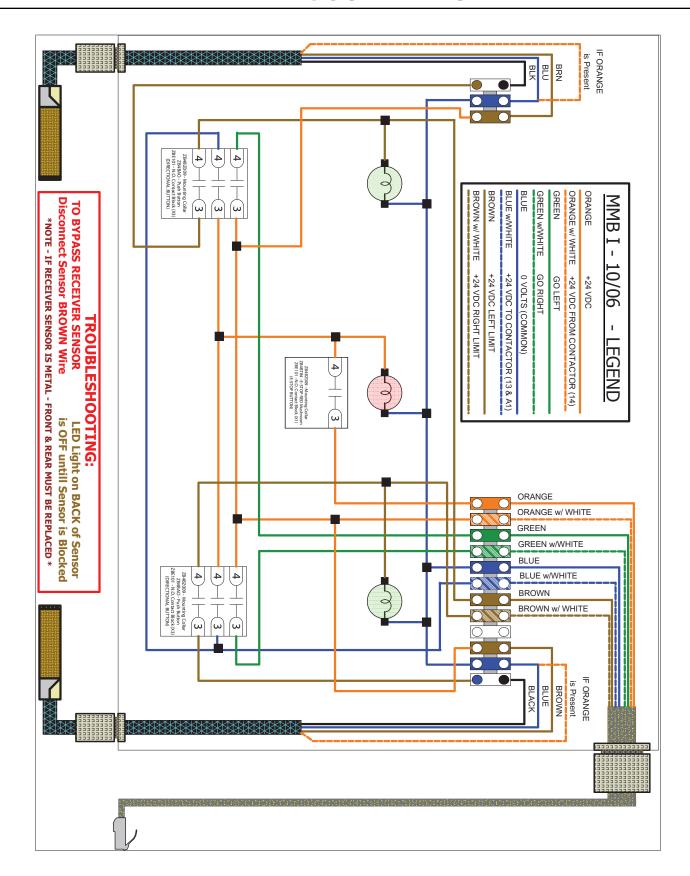

<u>Conclusion:</u> This unit has been inspected and serviced for safe operation and is operating as intended by the manufacturer.

## **WIRING SCHEMATIC**

### **WIRING SCHEMATIC**

### **WARRANTY & LIABILITY**

### Vidir Machine Inc. Warranty Agreement and Limitation of Liability

- 1. Vidir Machine Inc. ("Vidir") warrants solely that the equipment shall be free from any defect due to faulty work-manship or material deficiency at the time of delivery to the buyer thereof (the "Buyer") and for a period of one year therefrom.
- All work except minor repairs or adjustments to the equipment furnished on an emergency basis, will be performed during regular working hours. If the Buyer requests that repair work be performed outside of regular working hours, it is the responsibility of the Buyer to pay the difference between regular and premium labour rates at the then standard hourly billing rate.
- 3. This warranty shall be voided by any modifications to the equipment or any use of the equipment for any purpose other than that for which it was specifically intended.
- 4. This warranty is the only warranty made by Vidir. The Buyer hereby expressly waives any obligations or liability, including liability for loss or damages due directly or indirectly, any obligations including, without limitation, loss of use, revenue, or profit, shipping and handling, and injury to person or property.
- 5. It is the responsibility of Buyer to know, understand and comply with the work and safety laws and regulations in effect and governing Buyer's use of the equipment. To the extent governing law requires inspections, records keeping and/or after-purchase modifications to the equipment, it is the responsibility of the Buyer to arrange for and comply with such requirements and any associated costs are the sole responsibility of the Buyer. Vidir assumes no responsibility or liability for Buyer's performance under or compliance with such laws and regulations.
- 6. If the equipment is found by the Buyer to be defective, the Buyer must notify Vidir within a period of 30 days of discovery of the defect.
- 7. The Buyer is expected to provide access to all equipment covered by this warranty. Vidir shall not be responsible for any expense incurred in removing, replacing, or refinishing any part of the building structure necessary for the performance of Vidir's obligations under this warranty.
- 8. In the event that any alterations, additions, adjustments or repairs are made by others without Vidir's prior written consent, Vidir may, at its option, immediately terminate this warranty by providing written notice to the Buyer.
- 9. In the event Vidir is required to make emergency calls, repairs and/or replacements under this warranty occasioned by the Buyer or any user's negligence, improper operation or misuse of the equipment or by fire, explosion, flooding, the elements, strikes, labour troubles, vandalism, riots or civil commotion, or by any cause beyond Vidir's control. The Buyer shall reimburse Vidir for such emergency calls, repairs and/or replacements in accordance with the then current rates for such services.
- 10. Vidir's liability for injury to persons or property shall, in any event, be limited to that caused directly by its negligence. Vidir shall not be liable, however, on any account, for any damage or loss to the Buyer or its dealers, representatives, affiliates or agents resulting from business interruption, inconvenience, loss of profits, or special or, indirect or consequential damage. Vidir shall not be deemed to guarantee or warrant the continuing operation or operating efficiency of the equipment covered, nor shall Vidir be liable for any breakdowns thereof or for any damage to any other property of the Buyer not covered by this warranty but resulting from any breakdowns in or operating mishaps of the equipment covered.
- 11. Should any payment due by the Buyer become thirty days or more delinquent, Vidir may terminate this warranty by written notice, and all moneys owed Vidir shall be immediately payable on demand.
- 12. This warranty is not transferable or assignable by the Buyer.
- 13. Vidir reserves the right to determine, in its sole and absolute discretion the best means and methods to be employed for any corrective or repair work deemed necessary by Vidir pursuant to this warranty.
