

# Greaseable Sheave Pins and Sheaves for use on select 4-Post Challenger Lifts 40 Series.

Solving the needs of all lift industry distributors remains one of SVI's top specialties. In this case, several of the industry's most respected distributors asked us to develop greaseable sheaves and sheave pins for 4-post lifts to reduce the frequency with which standard sheaves and pins are replaced.

SVI exclusive greaseable sheaves and sheave pins are ideal for use on 4-Post lifts in high frequency shops where the lifts are constantly being cycled. These busy shops give standard sheaves and pins a real workout. Subsequently, distributors are called on to frequently replace the sheaves and pins on these lifts. The next time you are asked to work on the sheave and pins of a four post lift, consider a greaseable system. In this case adding some lubricity is a good thing. The bushings in the SVI design can properly function whether greased on a regular basis or forgotten to run dry. SVI distributors can now offer this SVI exclusive solution and increase the lift's use time and cycles between service intervals.

SVI Part No.	For	Replaces Ref #	Description
BH-7232-71G	Challenger	40050x	Greaseable Sheave
BH-7232-72G1	Challenger	40055x	Greaseable Sheave Pin 1 stack
BH-7232-72G1S	Challenger	40055x	Greaseable Sheave Pin 1 stack, rear (spaced)
BH-7232-72G2	Challenger	40055xx	Greaseable Sheave Pin 2 stack
BH-7232-72G4	Challenger	40055xxx	Greaseable Sheave Pin 4 stack
BH-7234-404G	Challenger	40116x	Greaseable Sheave Pin

Contact your favorite SVI representative with any questions. The parts listed above are intended for use on 40 Series Challenger lift models. If you need greaseable pins and sheaves for other models, please let us know.
