

TLE RE-CONNECT CHECKLIST

Store # _____ Inc # _____ Lift Type, 4P ___ 2P ___ Pad ___

For each of the below, initial and date each line to show you did that request for each location you are at doing a TLE re-connection:

- Inspect lift area installation to make sure it is not on a seam or too close to one, provide pictures to Rocky/Brandon/Tony before proceeding with the reconnect. _____
- Run/Connect air lines to lift(s) **straight down** from ceiling using black iron piping. _____
- Run/Connect air lines for EVAC(s) (1 for each EVAC) _____
- Run/connect oil lines for EVAC(s) (1 for each EVAC) _____
- Lower PVC piping for EuroVac to reach the floor _____
- OR
- Place/Mount Canister Vacuum(s) on floor. _____
- Place/Mount Computer Kiosk(s) where shop wants. _____
- Relocate or rotate arms of hose reels above each bay so that they do not hit the vehicles when lift is raised up. _____
- Any extra air lines should be ran if requested. _____
- If there are no shut off valves, add them if needed but not at the ceiling level so they cannot be reached. _____

We NEVER shut down the entire shop.

- Electrical lines ran/connected to LIFT. _____
- Electrical lines ran/connected to Canister Vacs. _____
- Electrical lines ran/connected to Computer Kiosk(s). _____
- ½" Empty Conduit ran for data lines that Telaidd will install, but the conduit is required for them prior to their arrival. _____
- Take pictures of entire lifts upon completion of job. (To include, Entire Shop, All Serial Plates, All Equipment installed, And Photo's from Outside Each Bay) _____

You are held responsible for any/all things not done when on a re-connection. If any other tech needs to complete your work at OME's cost this will directly affect your pay.
